

### Stretcher Leveling

Our stretcher leveling lines are the latest technology in producing panel flat material available today. The material is literally stretched beyond its yield point removing internal stresses so that material will remain flat even after laser cutting, punching, notching or plasma burning.

## exceeding our customers' expectations

For over twenty-five years our areas leading fabricators, OEMs and regional service centers have put their confidence in Ratner Steel Supply Center to deliver steel products of the utmost quality, reliability and service.

Why choose Ratner Steel Supply? Because we offer the best of both worlds. Our customers have available to them the unmatched value of honest customer relations of an established mid-sized privately owned service center, with the state-of-the-art capabilities of the largest publicly traded corporations.
